KTU Mission Statement

“Our goal is to provide quality work completed right the first time and accident free. We are committed to completing our work on time and under budget, utilizing compliant and ethical business practices. Innovative attitudes and actions will be presented by all of our employees, and all dealings will be handled with mutual respect.”

KTU Indoctrination

KTU takes pride in their commitment to Safety. It is the goal of KTU to send everyone home uninjured, back to their families the same way they came to work.

It has been recognized that the Safety Practices of KTU are above the industry standard. To aid in the Safety transition for those not accustomed to the Focus that KTU puts on Safety, an Indoctrination process has been put in place.

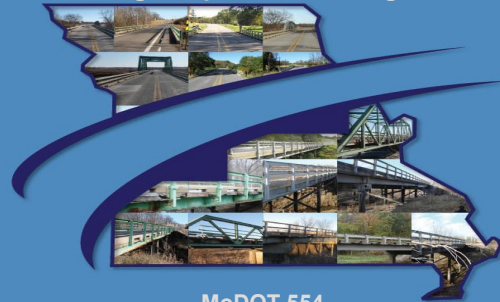

Before going to work on the MoDOT 554 project, every person will go through the KTU Safety Indoctrination. The Indoctrination process will consist of face-to-face interaction with KTU Staff, going over KTU specific

Safety practices. A picture “Cook Book” has been established to visually explain specific Safety practices. A “Welcome to MoDOT 554” video has also been developed to help convey KTU’s commitment to the Safety of every person on or near the MoDOT 554 project.

Work may commence once the KTU Safety Indoctrination has been completed.

Cutting Torches

All cutting torches will have flash arrestors in the torch as well as installed at the gauges.

Torches may only be ignited with a striker.
